Fourth Semester Project Progress Status Evaluation Abstract

Progress Status Evaluation (PSE)	Remark	Date	Signature of HOD
PSE-1 45%	Excellent on Coding	16/01/2024 to 10/03/2024	
PSE-2 19%	Good Behavior	16/01/2024 to 10/03/2024	
PSE-3 36%	Self Improvement	16/01/2024 to 10/03/2024	

Timeline Breakup to Schedule the Project (4th Semester)

Sl. No.	Project Activity	Description	Date of Completion	Sign of the Guide
	List each activity associate with the project	Provide details of each activity, how it relates to the overall project objectives and/ of key project milestones	Specify dates of completion for each activity	

PROJECT NAME :

Activity Name:	Discussion about DFD	**Date:**16/01/24

Description:
Data Flow, Entity Diagram, Data Store,
Levels of DFD : Level-0 , Level-1, Level-2

Signature

Activity Name:	Entity Relationship Diagram	**Date:**20/01/24

Description:
Common Entity Relationship Diagram Symbols.

Signature

Activity Name:	Unified Modeling Language	**Date:**25/01/24

Description:
Structural Diagram
Behavior Diagram

Signature

Activity Name:	Use Case Diagram	**Date:**27/01/24

Description:
Admin Use Case Diagram
Activity Diagram of User.

Signature

Activity Name:	Layout Designing by HTML	**Date:**01/02/24

Description:
Build up Login Portal .
Border layout.

Signature

Activity Name:	Build the Layout by HTML Tag	**Date:**07/02/24
Description: Use Tailed CSS. Details Creates By HTML Coloring By Using CSS. 		**Signature**

Activity Name:	Designing UI Component	**Date:**15/02/24
Description: Design UI Components based on Wire Frames Start with Basic Components such as Header, Footer, buttons 		**Signature**

Activity Name:	Implementation Core Feature	**Date:**18/02/24
Description: Beginning implementing core feature of fronted Focus on functionality over stage. 		**Signature**

Activity Name:	Styling and layout	**Date:**23/02/24
Description: Add styling to frame component . Creating visually layout . 		**Signature**

Activity Name:	Java script optimization	**Date:**26/02/24
Description: Connecting with Java script. Java script with data object manipulation . 		**Signature**

Activity Name:	Implementing Core Feature	**Date:**29/02/24
Description: Begin implementing core feature Conduct user acceptance testing		**Signature**

Activity Name:	Styling Destination Details	**Date:**03/03/24
Description: Style the destination details page components . Ensure details are presented .		**Signature**

Activity Name:	Integration Testing	**Date:**04/03/24
Description: Integration the fronted component with backend API and points .		**Signature**

Activity Name:	Connecting with database	**Date:**05/03/24
Description: Create database with user input . Entry with database system.		**Signature**

Activity Name:	Java Event Handling	**Date:**06/03/24

Description:
Learn about document object model.
Practice manipulating Dom elements using java script .

Signature

Activity Name:	Asynchronous Python	**Date:**07/03/24

Description:
The core of Python Event Handler is to manage these events and organize and make them work as intended in an intended manner.

Signature

Activity Name:	Local Storage and Client side	**Date:**08/03/24

Description:
Learn about the local storage.
Practice and Retrieving data from pages.
Implementing functionally .

Signature

Activity Name:	Django Framework	**Date:**09/03/24

Description:
Versatile develop of web page forms, templates, views, ORM, etc.
developed third-party packages including authentication, authorization, full-fledged Django powered CMS systems, add-ons and so on.

Signature

Activity Name:	Final Testing	**Date:**10/03/24

Description:
Unit testing involves testing individual units or components of the system, such as the functions and methods.
Integration testing involves testing the system's components to ensure that they work together correctly.
Functional testing involves testing the system's functionality against the specified requirements.
Performance testing involves testing the system's performance under different loads and conditions.
